

Adjustable Transfer Box Tower

Catalog # 38901

All Stainless Steel Construction

This Adjustable Transfer Box Tower with a removable transfer box will connect securely to your rack and cages.

The Transfer Box shown is made of aluminum for easier lifting. The doors are clear lexan that slide open horizontally.

The Transfer Box can be removed and used independently of the Tower.

Raising and lowering of the transfer box is done with the help of counter weights.

The Tower has two locking and two non-locking casters.

The transfer box is infinitely adjustable. Different sizes are available
